fruits or upon bread made of peas, or a composition of these with oats; and, during the winter, eat what is called broose, which is oat-meal mixed with the fat of salt beef; and, for want of fresh and wholesome water, use what is either hard and brackish, or putrid and stagnating.

Different ways of life have likewise a different influence on this disease. The lazy and indolent, and those of a sedentary life, as shoemakers, tailors, especially weavers, by reason of their working in damp places, are most subject to it; while hard labourers, and those who use much exercise, though living on the same, or even grosser food, keep entirely free. Fishermen, from their way of life, gross food, and habitual use of spirituous liquors, are often scorbatic.

The passions of the mind are experienced here to have a great effect. Those that are of a cheerful and contented disposition, are less liable to it, than others of a discontented and melancholy mind.

Lastly, It has always been remarked, that, in such circumstances as have been described, the present state of the body has a powerful influence in disposing to this affliction. They who are much exhausted and weakened by preceeding fevers, and other tedious fits of sickness, or they who have unsound and obstructed viscera (as after agues of the autumnal kind), are apt, by the use of improper diet, to become scorbatic. Others that labour under a suppression of any natural and necessary evacuation, as women who have their menses suppressed, especially if the obstruction is occasioned by fear or grief, are more subject than others in similar circumstances to this disease; as they are likewise at the time that these naturally leave them.

A TREATISE
OF THE SCURVY

IN THREE PARTS

Containing an inquiry into the Nature, Causes, and Cure, of that Disease
together with a Critical and Chronological View of what has been published on the subject

BY

JAMES LIND, M.D.
Fellow of the Royal College of Physicians in Edinburgh

EDINBURGH
PRINTED BY SANDS, MURRAY, AND COCHRAN FOR A. MILLAR, IN THE STRAND, LONDON

MDCCLIII
LIND'S TREATISE ON SCURVY

A Bicentenary Volume containing a reprint of the First Edition of A TREATISE OF THE SCURVY by James Lind, M.D. with Additional Notes

EDITED BY

C. P. STEWART, PH.D., D.SC.
AND
DOUGLAS GUTHRIE, M.D., F.R.C.S.E

1953
CONTENTS

EDITORS' FOREWORD ....................................................... V

A TREATISE OF THE SCURVY BY
JAMES LIND, M.D.

Preface ........................................................................ 5

PART I

I. A critical history of the different accounts of this disease .......... 11
II. Of its several divisions, viz. into scurvies cold and hot, acid and alcaline, &c. 38
III. Of the distinction commonly made into a land and sea scurvy . 52
IV. Of the scurvy being connate, hereditary, and infectious .......... 64

PART II

I. The true causes of the disease, from observations made upon it, both at sea and land .... 69
II. The diagnostics, or signs ............................................. 113
III. The prognostics .......................................................... 133
IV. The prophylaxis, or means of preventing this disease, especially at sea ... 137
V. The cure of the disease, and its symptoms ........................... 178
VI. The theory .................................................................. 201
VII. Dissections .................................................................. 227
VIII. The nature of the symptoms, explained and deduced from the foregoing theory and dissections ................................. 232
Contents

PART III

I. Passages in ancient authors, supposed to refer to this disease; together with the first accounts of it 249

II. Bibliotheca scorbutica: or, A chronological view of what has hitherto been published on the scurvy 262

Appendix 349

A Chronological Index of Authors 352

An Alphabetical Index of Authors, &c. 355

ADDITIONAL NOTES—BIOGRAPHICAL AND TECHNICAL

I. The Third Edition of the Treatise 361
   By C. P. Stewart, PH.D., D.SC., Reader in Clinical Chemistry, University of Edinburgh

II. The Lind Tradition in the Royal Naval Medical Service 369
   By Surgeon Vice-Admiral Sir Sheldon F. Dudley, K.C.B., M.D., F.R.C.P., F.R.C.S.E., F.R.S., Medical Director-General of the Royal Navy, 1941-5

III. James Lind and Some of His Contemporaries 387
   By Douglas Guthrie, M.D., F.R.C.S.E., Lecturer in History of Medicine, University of Edinburgh, and A. P. Meiklejohn, M.A., B.Sc., D.M., M.R.C.P., Senior Lecturer in Nutrition, University of Edinburgh

IV. Scurvy in the Nineteenth Century and After 404
   By C. P. Stewart

V. The Chemistry of Vitamin-C 413
   By E. L. Hirst, M.A., D.Sc., LL.D., F.R.S., Professor of Organic Chemistry, University of Edinburgh

VI. The Role of Ascorbic Acid in the Human Body 425
   By A. P. Meiklejohn, C. P. Stewart, and R. Passmore, M.A., D.M., Senior Lecturer in Physiology, University of Edinburgh
ILLUSTRATIONS

JAMES LIND, M.D.

Frontispiece

From an engraving by I. Wright from a painting by Sir George Chalmers, Bart. (1783). The engraving forms the Frontispiece to the copy of Lind's Essay on Diseases incidental to Europeans in Hot Climates in the library of Haslar Hospital. The signature is from Lind's letter to Sir Alexander Dick.
