

'Ignorance' of Greens berated by scientist

(Daily Telegraph 5.10.2000)

...One reason why Lovelock regards the Green movement "with mixed vexation and affection" is its obsession with the chemical industry. **"To many Greens, if a chemical like methyl iodide or carbon disulphide comes from some dark satanic mill, it is by nature evil, but if it comes from organically grown or natural seaweed, it must be good and healthy. To me, as a scientist, it does not matter where it comes from. I am poisoned if I eat too much of it."**
